

# MINI BEAK

by DANIEL MFG. INC.

*The Mini Beak is designed for use on the walk behind or stand on size machines.*

- Overall width (Universal) . . . . . 25 inches
- Overall height . . . . . 20 inches
- Overall fork width . . . . . 18 inches
- Overall fork length . . . . . 22 inches
- Jaw opening distance . . . . . 25 1/2 inches
- Gripping force (approx) . . . . . 3500 pounds  
(depends on input pressure)
- Material . . . . . high-strength, steel plate
- Weight . . . . . 220 pounds
- Shipping weight (approx) . . . . . 260 pounds
- Grub Bar for Mini . . . . . 25 pounds

The Mini Beak's bottom shoe, with it's patented shape, increases the skid loaders break out force while the powerful top jaw maintains a solid grip on the load.

***Built with quality parts; The Mini Beak can withstand the harshest job environments.***

### Custom Built

The Mini Beak is built for strength and is a "must-have" among contractors and landscapers for concrete removal, waste management, rock and tree handling or moving pipes, tires, pallets, etc.

### Easy Hook Up

Flat-face couplings, quickly connect to most skid-steer loaders.

Grub bar easily attaches with 1 pin. It is useful for pulling shrubs, small trees, posts, etc.
