

A rugged harrow rake for moving material, site preparation and finish grading.

Optional Equipment

Dual heat treated steel ripper shanks- Can be quickly lowered to a depth of 7" to loosen hard packed areas.

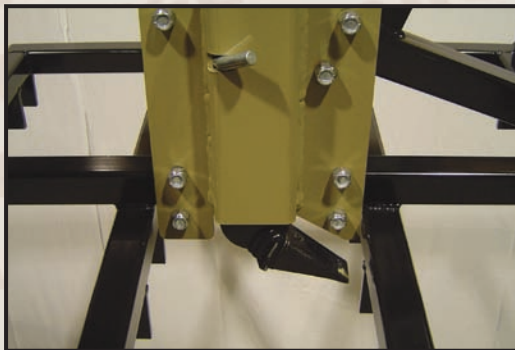

Universal skid steer quick attach hook up
Economical and maintenance free

Models

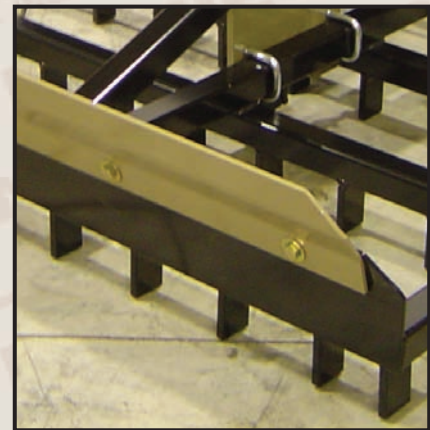

TR600 - 6' Wide

TR700 - 7' Wide

MR40 - 40" Wide for walk behind & mini skid loads

Shanks have replaceable universal bucket teeth.

Dozer blade extension adds an additional 4" of height for moving material out front.

A simple rugged tool that makes quick work of site prep finishing such as leveling, grading and seed preparation. It also works great for clearing debris like tall weeds, trash and larger rocks without picking up a lot of dirt.

Optional dozer extension enables you to move more loose material out front for faster leveling. Optional ripper shanks can be lowered to loosen undisturbed soil or deep compaction from heavy equipment.
